

Wing Clipper & Square Squared

Learn the techniques behind the Studio 180 Design (Deb Tucker) tool without committing to yet another project. In this class we'll investigate the Wing Clipper & Square Squared tools while creating 4" units that you can mix and match to create your own unique blocks like those pictured. Once you master the basics of each tool, learn even more techniques to create stunning blocks. Although this is a technique class, all the units we create can be put together in unique blocks perfect for a special sample quilt.

Put your flying geese on the right track by pointing them in the correct direction. Learn the simple secrets to creating crisp, clean units effectively and quickly. Expand the use of your Wing Clipper I by learning how to make Pickets and Quickets. Once you begin to recognize these units, you'll be surprised how often they appear in patterns from your favorite magazines and designers.

The square in a square unit can be found within blocks as well as sashing. Since this unit is often used to connect other units, it's important the points match up to the points of other blocks. In the past achieving the perfect points meant multiplying by $\sqrt{2}$. The Square Squared tool does the math for you. Save your sanity and those points with the Square Squared tool.

Fabric	Yardage
Focus	1/2 yard
Dark	1/2 yard
Medium	1/2 yard
Light/Background	1/2 yard

Class Supplies

- Studio 180 Wing Clipper I & Square Squared tools – available for purchase at a discount from the instructor the day of class
