

### **Class supply list – Circle Party Pinkeep**

*There are no pre-cut requirements for this class*

Sharp scissors (we will be cutting paper backed fusible and wool)

#22 and #24 Chenille needles

Steam-a-Seam 2 – or Steam-a-Seam Light. You can use Heat-N-Bond Light too. Steam-A-Seam allows you to reposition the appliques before you fuse them – Heat-N-Bond is a little more slippery and doesn't really reposition well.

12" X 12" piece for the top (you will have fusible left over)

Everything else needed to create the pinkeep is included in the kit. Additionally, I will have fusible and needles available if you can't find them. I will also have sand available to complete the pinkeep.
