

Studio with Madge Supply List

If you have done Studio before you will know what to bring. But if you are new or need a reminder, I have some suggestions.

Bring tools like rotary cutter, rulers and board. You might want to bring extra blades. Scissors and thread nippers might be needed.

Machine (if needed). Don't forget foot pedal, cord, instruction manual, and extra needles. Check your machine a few weeks before class and have it serviced, if needed. There is not a sewing machine repair person in the Studio. Bring some handwork or cutting or whatever to do in studio in case your machine poops out or you need a break from the machine.

Patterns, fabric, etc. to work on your project or projects. There should be wifi available if your patterns, etc are online, but you might want to double check about the wifi.

Don't forget a sheet to lay out blocks and/or some way to carry your accomplishments home.

Since we are in a new venue and do not know the classrooms, you might want to bring some extra lighting. I strongly suggest you bring an extension cord for your machine. Irons will be provided by MAQ.
