Quilting with Motifs

Quilting with Motifs by Teresa Fusco: My Quilt "The Bugs View" is made primarily out of leaves and stems, The Flowers were made from pieces of different fabrics to form the design. This is a creative class in which you will be the designer. As you pick through your fabrics in preparation for class, you will be training your eyes to see your fabrics with new purpose. Look for circles and florals, anything that draws your eye in.

To get a head start for class, come with your background pieced. On the quilt Bugs View, I started at the bottom-dirt and worked my way up to sky. I combined the two methods I love, piecing and appliqué to make my quilt, using the motifs! You can use a solid background or a pieced background, (a hand dye would work well) you will leave class with your design finished in Motifs.

Pattern Instructions and color photos \$5.00

I suggest having your backing pieced and bordered before class, if you are not bordering, please put a 2" border on your background basting stitch so that you may easily remove.

Teach on Sunday

Techniques: Design.

Beginner to Advanced

Project Easy

The design can be completed in class.
