

Mock Molas !

A Traditional Art

Modified and Made in Felt

Alice Ridge Quilts

Have you looked at the beautiful Molas from Panama and gone green with envy ? I have! I love the look of Traditional Molas, with all the layers of colored fabrics and fancy stitches !

I thought that I would make one myself, but then *really* turned green when I realized how much detail work and teeny tiny stitches were involved !

So, I created this class to modify the Traditional Mola by using Felt to make a project that keeps the style and colors of the original, but is so much easier and faster!

This is a hand work class, but it is easy and relaxing to do.

I hope you enjoy these Molas as much as I do!

A kit is required, and it will contain all the supplies for the project. You only need to bring your general Hand Sewing Supplies, ie thimble, Small Sharp Scissors, a range of needle sizes – if you have a brand preference, otherwise I will have needles for you.
